

Special regulations Dutch 24h 2026 editions

Kartcentrum Lelystad has a very short PIT entrance located just after the start/finish line. For this reason, it is possible that when several teams enter the pit lane at the same time, congestion may occur at the PIT entrance.

It has therefore been decided for this edition that:

1. When the yellow light on the start/finish arch flashes, the pit lane is closed!
 - When passing the start/finish line, drivers must keep as far to the left as possible to avoid coming into contact with any congestion.
 - The pit crew will resolve any situation as quickly as possible and reopen the pit lane entrance.
2. When the pit lane entrance is reopened, the yellow light will go out.
3. If a driver attempts to enter the pit lane despite the yellow light, the race officials will penalise them.
 - This also applies if the driver is able to enter without any problems immediately after the situation has been resolved.
 - If the light has not yet gone out, it is NOT permitted to enter.
4. During a safety kart situation, the yellow light will also be activated to indicate that the pit lane is closed.
